Crypto Ready Set Go!!!

## Initial Set-up Guide

## Before You Get Started

You will need a smartphone with an active phone number that can send and receive both SMS and email messages. The easiest way to use this guide is to have this document open on a computer screen and follow along with your smartphone. If you get stuck during the initial set-up, please scan or tap the following QR code to request help:

## Step 1 - Install Authy By Twillio

Please scan the following QR code with your smartphone:

## Step 2 - Download & Install The Crypto.com App

Please scan the following QR code with your smartphone:

## Step 3 - Crypto.com Account Registration

Please scan the following QR code with your smartphone:

## Step 4 - Enable 2FA

Please scan the following QR code with your smartphone:

## Step 5 - Set-Up Fiat Wallet

Please scan the following QR code with your smartphone:

## Step 6 - Download OnChain Wallet

Please scan the following QR code with your smartphone:

## Step 7 - Install OnChain Wallet

Please scan the following QR code with your smartphone:

## Step 8 - Connect OnChain Wallet

Please scan the following QR code with your smartphone:

## Congratulations!

If you have completed all eight steps, you should now have an active account with Crypto.com that is connected to an Onchain Wallet. However, registering for our Advanced Training will give you access to additional guides that will give you the confidence to buy and sell cryptocurrency. You will also gain access friendly support calls to help you become more comfortable with buying and selling crypto. Please scan or tap the following QR Code:
